Pioneer Consulting Hires Marine Expert

Boston, Massachusetts, USA December 8, 2016—Pioneer Consulting, a prominent international submarine cable consulting organization, continues to strengthen and expand its core team with the newly appointed Director. Pioneer Consulting is pleased to announce Mr. Ryan Wopschall has been hired for this post.

Mr. Wopschall brings ten years of undersea cable experience to Pioneer Consulting from his previous employer specializing in offshore geotechnical analysis, marine survey, and geosciences services. During that time, he helped to develop international business for cable surveys and grow a global marine advisory consultancy.

The addition of Mr. Wopschall to the already strong Pioneer team gives Pioneer the heft to tackle multiple, simultaneous, global project management engagements as well as market analysis projects.

With his multifaceted knowledge of the undersea cable industry, and his expertise in the fields of marine services and undersea route engineering and surveying, Mr. Wopschall's responsibilities will also include adding to Pioneer Consulting's existing global market study capability. In addition, he brings to the firm his business development and marketing skills as well as technical proficiency in planning submarine cable systems.

When asked about his new role within Pioneer Consulting, Mr. Wopschall stated: "I am truly delighted to contribute to a company deeply rooted in the submarine cable industry and look forward to working with customers worldwide."

Mr. Wopschall holds a BSc in Engineering Geology from the University of California, Santa Barbara and a Professional Certificate in Business Development from the University of Washington's Foster School of Business and is based in Oregon, USA. To reach Mr. Wopschall, please contact him via: r.wopschall@pioneerconsulting.com or via: +1 541 306 1549.

About Pioneer Consulting: Pioneer offers a comprehensive set of services for the submarine fiber optic telecommunication system industry such as: turnkey project management, due diligence, engineering and implementation, and market and technical studies.
