Marine Services for Undersea Telecom Cables

A Technology & Market Assessment Report: Table of Contents

(including list of figures and tables beginning on page 15)

Legal Address: 221 River Street, 9th Floor, Hoboken, New Jersey 07030 USA

www.pioneerconsulting.com

Table of Contents

CHAPTER 1: EXECUTIVE SUMMARY

1.1. OBJECTIVE

1.2. REPORT SUMMARY

1.2.1. Submarine Telecommunications Marine Services Market

1.2.2. Changes in the Past Decade

1.2.3. Vessels

1.2.4. Services

1.2.5. The Future

CHAPTER 2: INTRODUCTION

2.1. MARINE SERVICE MARKET ASSUMPTIONS AND DEFINITIONS

2.2. OVERVIEW OF THE MARINE SERVICES MARKET FOR SUBMARINE TELECOMMUNICATIONS CABLE

2.3. INDUSTRY BACKGROUND

2.4. INSTALLATION - DEEP AND SHALLOW WATER

2.5. REPAIR - DEEP AND SHALLOW WATER

2.6. MARINE SURVEY

2.7. CABLE STORAGE

CHAPTER 3: DEEP WATER MARINE SERVICES - INSTALLATION AND REPAIR

3.1. DEEP WATER OPERATIONS OVERVIEW

3.1.1. Pre-Lay Grapnel Run

3.1.1.1 PLGR Equipment

3.1.1.1.1. Dynamometer

3.1.1.1.2. Rope and Grapnel Rigging

3.1.1.1.3. Vessel Speed

3.1.1.1.4. Number of Passes

- 3.1.1.1.5. Periodic Check of Grapnels
- 3.1.1.1.6. Active Cable Crossings
- 3.1.1.1.7. Disposal of Recovered Debris
- 3.1.2. Route Clearance
 - 3.1.2.1 Permission and Notifications
 - 3.1.2.2 Types of Out of Service Cables
 - 3.1.2.2.1. Corridor Width
 - 3.1.2.2.2. Recovery and Repositioning Operations
- 3.1.3. FAD Avoidance
- 3.1.4. Vessel Loading
 - 3.1.4.1 Vessel Loading Planning and Coordination
 - 3.1.4.2 Load Plan
 - 3.1.4.3 Load Rates
 - 3.1.4.4 Single—Dual Load Lines
 - 3.1.4.5 Level Loading
 - 3.1.4.6 Cable Stow
 - 3.1.4.7 Down Runners and Up Runners
 - 3.1.4.8 Repeater Stowage
 - 3.1.4.9 Rigging
 - 3.1.4.10 Transporters
 - 3.1.4.11 Cable Counters
 - 3.1.4.12 Cable Path
 - 3.1.4.13 Dunnage
 - 3.1.4.14 Keystone and Plastic Sheeting
 - 3.1.4.15 Cable Handling Guidelines
 - 3.1.4.16 Spare Cable/Repeaters
 - 3.1.4.17 Impactographs
 - 3.1.4.18 Factory As-Built Information

- 3.1.4.19 System Schematic
- 3.1.4.20 Freighters
- 3.1.4.21 Barges
- 3.1.4.22 40 Foot Open Top Containers
- 3.1.4.23 Transporting PLSE Containers
- 3.1.4.24 Transits
- 3.1.5. Installation
 - 3.1.5.1 Start of Deep Sea Lay Operations
 - 3.1.5.1.1. Direct Landings
 - 3.1.5.1.2. Recovery of Pre-laid Shore Ends
 - 3.1.5.1.3. Recovery of Deep Sea Cable Ends
- 3.1.6. Laying Operations
 - 3.1.6.1 Cable Slack
 - 3.1.6.2 Managing Cable Slack
 - 3.1.6.3 Burial Operations
 - 3.1.6.4 End of Lay Operations
 - 3.1.6.4.1. Buoy Operations
 - 3.1.6.4.2. Streamed Ends
 - 3.1.6.4.3. Final Splices and Final Bights
 - 3.1.6.5 Post Lay Burial and Inspection (PLIB)
 - 3.1.6.5.1. Post Lay Burial (PLB)
 - 3.1.6.5.2. Post Lay Inspection (PLI)
 - 3.1.6.5.3. Remotely Operated Vehicles (ROVs)
 - 3.1.6.5.4. Water Jetting Systems
 - 3.1.6.5.5. ROV Launch and Recovery Systems (LARS)
 - 3.1.6.5.6. Cable Tracking Devices
 - 3.1.6.5.7. Active and Passive Modes of Operation
 - 3.1.6.5.8. Sonar

- 3.1.6.5.9. Subsurface Positioning
- 3.1.6.6 Touchdown Monitoring (TDM)
- 3.1.7. Branching Units
 - 3.1.7.1 BU Terminology
 - 3.1.7.2 First Branch Leg Installation
 - 3.1.7.3 Second Branch Leg Installation
 - 3.1.7.4 Stub Tail Splicing Operation
 - 3.1.7.5 Branching Repeater Overboarding
- 3.1.8. Cable Jointing
 - 3.1.8.1 Installation Splices
 - 3.1.8.2 Initial Splice
 - 3.1.8.3 Final Splice
 - 3.1.8.4 Repair Splices
 - 3.1.8.5 Typical Cable Joint Process
 - 3.1.8.6 Fusion Splicing
 - 3.1.8.7 Cleavers
 - 3.1.8.8 Fusion Splicing Machines
 - 3.1.8.9 The Fusion Process
- 3.1.9. Shipboard Testing
 - 3.1.9.1 Shipboard Testing Facilities
 - 3.1.9.2 Power Feed Equipment
 - 3.1.9.3 Shipboard Power Safety
 - 3.1.9.4 Coherent Optical Time Domain Reflectometer (COTDR)
 - 3.1.9.5 Optical Spectrum Analyzer (OSA)
 - 3.1.9.6 Megohmmeter (Megger)
 - 3.1.9.7 Optical Power Meters
 - 3.1.9.8 Optical Time Domain Reflectometer (OTDR)
 - 3.1.9.9 Tone Generator

- 3.1.9.10 Shipboard Tests Vessel Loading
 - 3.1.9.10.1. Daily Tests
 - 3.1.9.10.2. Assembled Shipload Testing (ASL)
 - 3.1.9.10.3. Start of Lay Testing—Beach Landing
 - 3.1.9.10.4. Start of Lay Testing—Streamed Ends
 - 3.1.9.10.5. Start of Lay Testing—Initial Splice Testing
 - 3.1.9.10.6. Main Lay Cable Testing
 - 3.1.9.10.7. Final Splice/End of Lay Testing
 - 3.1.9.10.8. Cable Jointing Testing
 - 3.1.9.10.9. Spare Wet Plant Testing Considerations and Procedures
- 3.1.10. Cable/Pipeline Crossings
- 3.1.11. Industry Recommendations
- 3.1.12. Cable Routing
- 3.1.13. Crossing Agreements
- 3.1.14. Cable Crossings Guidelines
- 3.1.15. Like to Like Cable Types
- 3.1.16. Repeaters Near Cable Crossings
- 3.1.17. Cable Bights Near Crossings
- 3.1.18. Branching Units Near Crossings
- 3.1.19. Burial Operations Near Crossings
- 3.1.20. Burial Operations Near Crossings
- 3.1.21. Parallel Cable Routing
- 3.1.22. Narrow Passages/Shore End Approaches
- 3.1.23. Pipeline Crossings
- 3.1.24. Pipeline Crossing Agreements
- 3.1.25. Cable Pipeline Separation
- 3.1.26. Protective Sleeves
- 3.1.27. Concrete Mattresses

3.1.28. Repairs

3.1.29. ROV Cut and Recovery

3.2. DESCRIPTION OF DEEP-WATER VALUE CHAIN

3.2.1. Desk Top Study

3.2.2. Marine Cable Route Survey

3.2.3. Cable Engineering

3.2.4. Manufacturing and Integration

3.2.5. Deep Sea Installation

3.2.6. Documentation

3.2.7. Maintenance

3.3. VESSELS/EQUIPMENT SPECIFIC TO DEEP WATER OPERATIONS

3.3.1. Equipment

3.3.1.1 Cable Engines

3.3.1.2 Cable Drum Engines

3.3.1.3 Linear Cable Engines (LCEs)

3.3.1.4 Cable Counters

3.3.1.5 Dynamometers

3.3.1.6 Navigational Equipment

3.3.1.7 Dynamic Positioning (DP)

3.3.1.8 Echo Sounders

3.3.2. Technical Specifications

3.3.3. Economics

3.4. KEY ISSUES AND TRENDS

3.4.1. Multipurpose Vessels

3.4.2. Current Cables Fleet

3.4.3. Sea Plow Capabilities

3.4.4. Cable Laying Software

3.4.5. Dynamic Positioning (DP) Requirements and Capabilities

CHAPTER 4: SHALLOW WATER MARINE SERVICES - INSTALLATION AND REPAIR

4.1. SHALLOW WATER OPERATIONS OVERVIEW

4.1.1.1 Planning and Logistics of Shore End Landings

4.1.1.2 Types of Shore End Cable Protection

4.1.1.3 Unburied Shore End Landings

4.1.1.4 Buried Shore End Landings

4.1.1.5 Cable Protection Measures

4.1.1.6 Beach Trenching

4.1.1.7 Beach Conduits

4.1.1.8 Diver Inspection

4.1.1.9 Beach Restoration

4.1.1.10 Interface with Terrestrial Cable Installation Operations

4.1.2. Direct Landings

4.1.2.1 Shore End Pull-In Methods

4.1.2.2 Deadman Anchors

4.1.2.3 Pull in Operations

4.1.2.4 Armor Clamp

4.1.3. Pre-Laid Shore Ends (PLSE)

4.1.3.1 Shallow Water Restrictions

4.1.3.2 Shallow Water Alter Courses

4.1.3.3 Navigational Hazards

4.1.3.4 Seasonal Restrictions

4.1.3.5 Cost Efficiencies

4.1.3.6 Deep Burial Requirements

4.1.3.7 Planning and Engineering PLSEs

4.1.3.8 Manufacturing and Shipping Considerations

4.1.3.9 Depth of Water Considerations

- 4.1.3.10 Cable Jointing
- 4.1.3.11 Daytime Operations vs. 24 Hour Operations
- 4.1.3.12 Testing
- 4.1.3.13 Shallow Water Cable Protection
- 4.1.4. Articulated Pipe
- 4.1.5. Shallow Water Trenching
- 4.1.6. Diver Jetting
 - 4.1.6.1 Airlifting
 - 4.1.6.2 Water Dredging
- 4.1.7. Horizontal Directional Drilling
- 4.2. MARINE MAINTENANCE
- 4.3. VESSELS/EQUIPMENT SPECIFIC TO SHALLOW WATER OPERATION
 - 4.3.1. Equipment (Including Cable Protection Equipment)
 - 4.3.2. Technical Specifications
 - 4.3.2.1 Four Point Mooring Tug and Barge
 - 4.3.2.2 Shallow Water DP Vessels
 - 4.3.2.3 Beachable Vessels
 - 4.3.3. Shallow Water Burial Tools
 - 4.3.4. Role of Permitting in Vessel Selection
 - 4.3.5. Economics
- 4.4. KEY ISSUES AND TRENDS–SHALLOW WATER OPERATIONS
 - 4.4.1. Self-Performed vs. Subcontracted Services
 - 4.4.2. Every Landing Has Unique Requirements

CHAPTER 5: MARINE SURVEY MARKET

- 5.1. OVERVIEW OF SURVEY FOR SUBMARINE TELECOM CABLES
- 5.2. SURVEY MARKET ROLE IN MAINTENANCE AND INSPECTION
- 5.3. SURVEYS FOR UNDERSEA TELECOM CABLE

5.3.1. Desk Top Study/Cable Route Study

5.3.2. Site Visits

5.3.3. Inshore Survey and Beach Survey

5.3.4. Offshore Survey

5.3.4.1 Multibeam Echo Sounding (MBES) or Swath Bathymetry

5.3.4.2 Side-scan Sonar (SSS)

5.3.4.3 Sub-Bottom Profiling (SBP)

5.3.4.4 Seabed Samples

5.3.4.5 Burial Assessment Survey (BAS), CPTs

5.3.4.6 In-Service Cable Crossings (Magnetometry)

5.3.4.7 Branching Units (BUs) and Planned Cable Crossings

5.3.4.8 Charting and Survey Reports

5.3.5. Port, Harbor and Coastal Surveys

5.3.6. Autonomous Underwater Vehicles (AUV)

5.3.7. Airborne LIDAR Bathymetry

5.4. KEY SURVEY COMPANIES

5.4.1. Fugro

5.4.2. EGS

5.4.3. Other Survey Companies and Vessels of Opportunity

5.4.3.1 Oceaneering International, Inc.

5.4.3.2 Terrasond

5.4.3.3 Elettra (Orange Marine)

5.4.3.4 Williamson & Associates:

5.4.3.5 Maritech

5.4.3.6 Gardline Geosurvey Limited

5.4.3.7 GEMS Survey

5.4.3.8 IT International Telecom

5.4.3.9 Additional Survey Resources

5.5. KEY SURVEY EQUIPMENT/ASSETS

5.5.1. Multibeam Echosounders (MBES), Swath Bathymetry

5.5.2. Side-scan Sonar (SSS)

5.5.3. Sub-Bottom Profilers (SBP)

5.5.4. Magnetometers

5.5.5. Seabed Sampling

5.5.6. Cone Penetrometer Tests (CPTs)

5.5.7. Towed Continuous E-BAS Equipment

5.5.8. Ultra-Short Baseline (USBL) Acoustic Positioning

5.6. BETTER SURVEY STUDIES/ROUTES FOR CABLE INSTALLATION

5.7. ROUTE AND CABLE ENGINEERING

5.7.1. Route Selection

5.7.2. ICPC Recommendations

5.7.3. Burial Requirements

5.7.4. Cable Selection

5.7.5. Cable Slack Allocation

5.7.6. Initial and Final Splices, Branching Units and Cable Allowances

CHAPTER 6: MAINTENANCE ARRANGEMENTS

6.1. CLUB AGREEMENTS

6.1.1. Atlantic Cable Maintenance Agreement

6.1.2. 2 Oceans Cable Maintenance Agreement

6.1.3. Mediterranean Cable Maintenance Agreement

6.1.4. North American Zone Cable Maintenance Agreement

6.1.5. South East Asia/India Ocean Cable Maintenance Agreement

6.1.6. Yokohama Zone Cable Maintenance Agreement

6.1.7. Pacific and Indian Ocean Cable Mutual Agreement

6.2. PRIVATE MAINTENANCE AGREEMENTS

- 6.2.1. Atlantic Private Maintenance Agreement
- 6.2.2. Asia Pacific Marine Maintenance Service Agreement
- 6.2.3. E-Marine
- 6.2.4. South Pacific Marine Maintenance Agreement
- 6.2.5. Northern Pacific Marine Maintenance Service Agreement
- 6.2.6. IT International Telecom — Sentinel Maintenance
- 6.2.7. BSC Submarine Cable Maintenance

6.3. NEW DEVELOPMENTS IN THE MAINTENANCE MARKET

- 6.3.1. Alternatives to the Traditional Maintenance Agreement Model

6.4. SHALLOW WATER MAINTENANCE

- 6.4.1. Shallow Water Inspections

CHAPTER 7: SUBMARINE CABLE STORAGE

7.1. CABLE DEPOTS AROUND THE WORLD

- 7.1.1. SubCom
- 7.1.2. Global Marine Systems Limited (GMSL)
 - 7.1.2.1 Bermuda Cable Depot
 - 7.1.2.2 GMSL Portland Depot
- 7.1.3. Alcatel Submarine Networks (ASN)
 - 7.1.3.1 Alcatel Submarine Networks (ASN) Cable Factory in Calais
- 7.1.4. Orange Marine
 - 7.1.4.1 Brest, France – The Atlantic Marine Base
 - 7.1.4.2 Catania, Italy Depot
 - 7.1.4.3 La Seyne Sur Mer, France
- 7.1.5. E-Marine PJSC
- 7.1.6. S. B. Submarine Systems Co., Ltd. (SBSS)
- 7.1.7. Kokusai Cable Ship Co., Ltd (KCS)
- 7.1.8. KT Submarine (KTS)

7.1.9. Baltic Offshore

7.1.10. IT International Telecom

7.1.10.1 The Atlantic Facility

7.1.10.2 The Pacific Facility

7.1.11. Subsea Network Services

7.2. UNIVERSAL JOINT (UJ)

7.2.1. Locations of UJC Member Companies Jointer Training Schools

7.2.2. Introduction to Jointer Training

7.2.3. New Technology Transfer

7.2.4. UJC Training Standard

7.2.5. Training Course Syllabus

CHAPTER 8: MARKET PARTICIPANTS

8.1. Turnkey System Suppliers / Installers

8.1.1. SubCom

8.1.2. Alcatel Submarine Networks (ASN)

8.2. MARINE INSTALLATION PROVIDERS

8.2.1. Orange Marine

8.2.2. NTT/NTT WE Marine

8.2.3. KDDI/KCS

8.2.4. Optic Marine

8.2.5. Limin Marine and Offshore

8.2.6. ASEAN Cables Pte Ltd

8.2.7. S. B. Submarine Systems Co., Ltd. (SBSS)

8.3. SHALLOW WATER INSTALLATION COMPANIES

8.3.1. Caldwell Marine International

8.3.2. Harbor Offshore, Inc.

8.3.3. Durocher Marine

8.3.4. Van Oord

8.3.5. Maritech

8.3.6. Great Eastern Group

8.3.7. Optic Marine

8.3.8. Marine Consultants & Contractors (MCC)

8.3.9. ASEAN Cables Pte Ltd

8.4. SYSTEM SUPPLIERS AND CABLE MANUFACTURERS

8.4.1. Nippon Electric Company (NEC)

8.4.2. Huawei Marine Networks (HMN)

8.4.3. Norddeutsche Seekabelwerke (NSW)

8.4.4. Nexans

8.5. EQUIPMENT PROVIDERS

8.5.1. Route Survey Equipment Providers

8.5.2. Cable Burial Equipment Providers

8.5.3. Remotely Operated Vehicles (ROVs) Providers

8.5.4. Cable Handling Equipment Providers

8.5.5. Cable Deployment and Monitoring Software Systems

8.6. REGULATORY MANAGEMENT SERVICES

8.7. ENVIRONMENTAL MANAGEMENT SERVICES

CHAPTER 9: INSTALLATION COST AND SCHEDULE ESTIMATING TOOLS

9.1. INSTALLATION COST AND SCHEDULE ESTIMATING

9.2. PIONEER CONSULTING GOCABLE.IO

9.3. MAKAIPLAN

9.4. OPERATIONAL PRODUCTION RATES

CHAPTER 10: TECHNOLOGY AND DEVELOPMENT TRENDS

10.1. PLOWING EQUIPMENT AND FACILITIES

10.2. JETTING EQUIPMENT AND FACILITIES

10.3. JOINTING EQUIPMENT AND FACILITIES

10.3.1. Universal Jointing (UJ)

10.3.2. Proprietary Manufacturers' Jointing

10.4. DEVELOPMENT OF BURIAL TOOLS

10.4.1. Increased Bollard Pull (from 40-60 Tonnes to 150 Tonnes)

10.4.2. 3 Meter (Jetting) Plows

10.4.3. 3 Meter ROV Jetting Packages

10.4.4. 5 Meter Plows

10.5. DEVELOPMENTS IN ROUTE PLANNING

10.5.1. Digital Terrain Modeling—Minimizing Unsupported Cable Spans

10.5.2. Burial Assessment Surveys—Improving Burial Results and Confirming Armor Decisions

10.5.3. Automated Identification System for Desk Top Study Route Planning

10.5.4. DTS Marine Surveys

10.5.5. Drones

10.6. DYNAMIC POSITIONING IMPROVEMENT—IMPROVING CABLE POSITIONING AND SLACK MANAGEMENT

10.7. DEVELOPMENT IN CABLE LAYING CONTROL SYSTEMS—MINIMIZING LOOPS AND UNSUPPORTED SPANS

10.8. TOUCHDOWN MONITORING—VALIDATING CABLE BOTTOM POSITION AND/OR BURIAL

10.9. POST-LAY INSPECTION (PLI)—VALIDATING BURIAL DATA

10.10. CABLE AWARENESS—CABLE AWARENESS CHARTS, FISHERIES LIAISON

10.11. SHALLOW WATER PROTECTION—HORIZONTAL DIRECTIONAL DRILLING, SPLIT PIPE, CABLE PINNING

CHAPTER 11: CONCLUSIONS AND OBSERVATIONS

11.1. OBSERVATIONS

11.1.1. Submarine Telecommunications Marine Services Market

11.1.2. Vessels

11.1.3. Services

11.1.4. The Future
